For those that are making last-minute decisions, we put together this guide to sort things out. We included some of our favorite brunch spots that you can reserve via the **DoorDash** app and the spots that will make ordering in extra special.

Don't tell mom there's another queen in town. This one makes it easy to order takeout or delivery via DoorDash. Start with 16 oz. cocktails and mosey on down to their wok and noodles options. She might not figure out their menu is plant-based cuisine. Other great options are the **bao sliders**, **crispy rice**, and **avocado lime tartare**.
